Experiment 2: User Interface Prototype for a Mobile Station in Figma

Aim: To design a user interface prototype for a mobile station using Figma, considering connectivity and convenience.

Procedure:

1. Open Figma and create a new design file.
2. Create a mobile phone frame with a suitable background.
3. Design a home screen showing network signal, battery level, and connectivity status.
4. Add buttons for calls, messages, contacts, Wi-Fi, and mobile data.
5. Use suitable icons and colors to make the interface attractive and user-friendly.
6. Arrange the elements neatly for easy navigation and convenience.
7. Connect the screens using interactive buttons to demonstrate the prototype.

Output:

Result: A user-friendly mobile station interface prototype was successfully designed using Figma, considering connectivity and convenience.
