Experiment 10: Comparison of Multiple Access Techniques in Figma

Aim: To create a visual representation in Figma showcasing the differences between various multiple access techniques.

Procedure:

1. Open Figma and create a new design file.
2. Create a frame with a suitable background.
3. Draw separate sections for FDMA, TDMA, and CDMA.
4. Represent FDMA using different frequency channels, TDMA using different time slots, and CDMA using different codes.
5. Add simple diagrams to illustrate how users share network resources.
6. Use different colors and labels to distinguish the techniques.
7. Add a comparison table showing their key differences.

Output:

Result: A visual comparison of FDMA, TDMA, and CDMA multiple access techniques was successfully created using Figma.
