Course Name: Mobile Computing

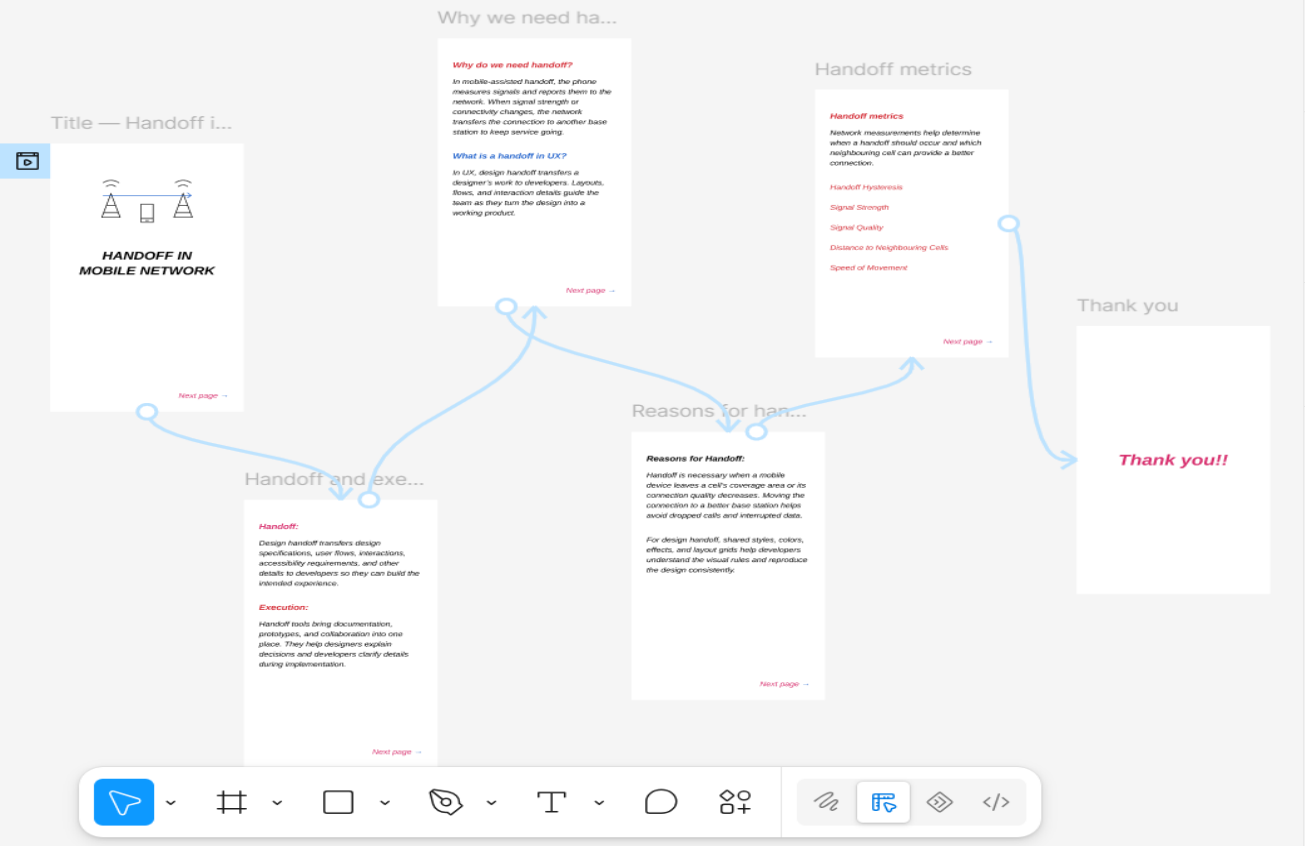

Experiment 6: Handoff Scenario in a Mobile Network Using Figma

Aim: To simulate a handoff scenario in a mobile network and visualize the process using Figma.

Procedure:

1. Open Figma and create a new design file.
2. Draw two cellular coverage areas representing Cell A and Cell B.
3. Place a mobile device inside Cell A and add base stations to both cells.
4. Draw arrows showing the movement of the mobile device toward Cell B.
5. Illustrate signal strength decreasing in Cell A and increasing in Cell B.
6. Add arrows to show the handoff from the old base station to the new base station.
7. Use labels and colors to explain each stage of the handoff process.

Output:

Result: A visual simulation of the mobile network handoff process between two cellular areas was successfully created using Figma.
