Experiment 6: Cellular System Performance Dashboard in Figma

Aim: To develop a dashboard prototype displaying performance criteria for a cellular system using Figma..

Procedure:

1. Open Figma and create a new design file.
2. Create a dashboard frame with a suitable background.
3. Add cards displaying signal strength, network availability, call success rate, and latency.
4. Use charts and graphs to represent network performance.
5. Add icons and colors to highlight important performance indicators.
6. Arrange the dashboard components neatly.
7. Add labels and headings to improve readability.

Output:

Result: A cellular system performance dashboard prototype was successfully designed using Figma.
