Experiment 9: GSM Service User Interface Prototype in Figma

Aim: To develop a user interface prototype for a GSM service using Figma.

Procedure:

1. Open Figma and create a new design file.
2. Create a mobile phone frame.
3. Design a home screen displaying network signal, operator name, and connectivity status.
4. Add buttons for voice calls, SMS, contacts, and network settings.
5. Use appropriate icons and colors for the interface.
6. Arrange the elements for easy navigation and convenience.
7. Connect the screens using interactive buttons to demonstrate the GSM service prototype.

Output:

Result: A user-friendly GSM service interface prototype was successfully designed using Figma.
