Course Name: Mobile Computing

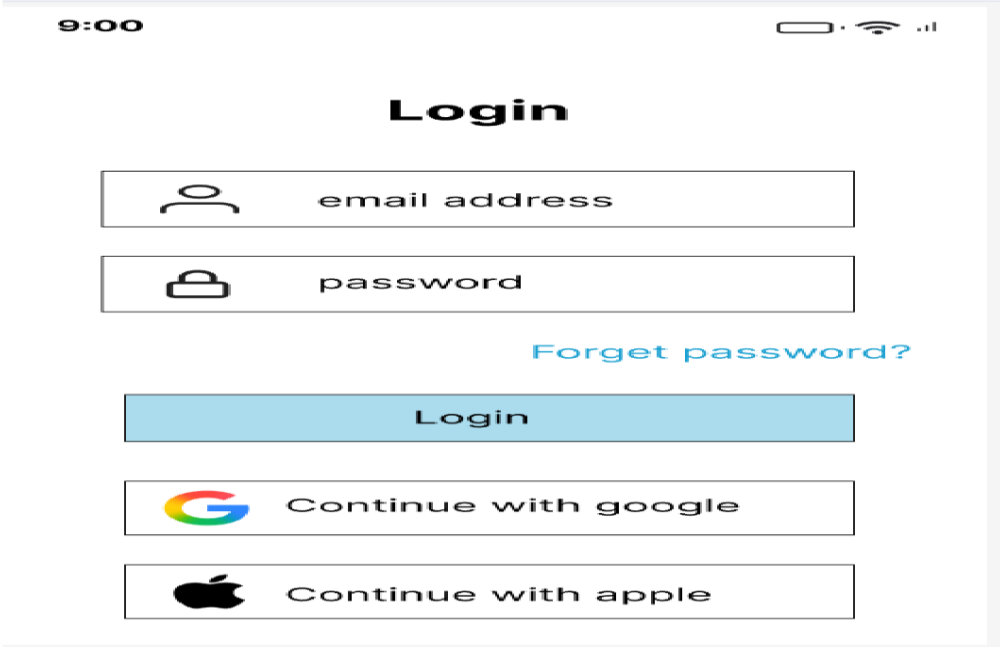

Experiment 11: Design a wireframe for a mobile application that incorporates security measures using Figma

Aim: To design a mobile application wireframe using Figma with basic security features like login, password protection, OTP verification, and fingerprint authentication.

Procedure:

1. Open Figma and create a new design file.
2. Select a mobile phone frame.
3. Design a welcome screen.
4. Create a login screen with username and password.
5. Add a registration screen.
6. Design an OTP verification screen.
7. Add fingerprint authentication.
8. Create a home screen.
9. Add security settings and logout options.
10. Connect all screens using the Prototype option.

Output:

Result: Successfully designed a mobile application wireframe using Figma with basic security features to protect user information.
